Transportation
Resources and Contacts

VDOT's Web site – Visit www.VirginiaDOT.org for a wide range of transportation information including road conditions, project updates and much more.

Other sources online:

The Dashboard – A one-stop information source that shows the latest project status on budgets and deadlines. The Dashboard measures progress of highway construction projects that are under way and those that are planned for advertisement.

Quarterly Report – VDOT's report card provides a quick summary of how the agency is performing with completing construction and maintenance contracts on time and within budget.

Six-Year Improvement Program
A view of allocations for transportation projects in the construction, development or study phase over the next six years.

VDOT Highway Helpline
1-800-367-ROAD
(TTY users, call 1-800-432-1843)
Call this number for the latest information on road and traffic conditions, to report unsafe conditions, and to request work for state-maintained roads, or place your request online at http://www.virginiadot.org/com-travel/eoc/citizen.asp

A Few Facts
About Transportation in Virginia

Highways -There are more than 57,300 miles of state-maintained highways in Virginia.

Miles driven - Motorists in Virginia drive more than 200 million miles each day on Virginia's roadways.

Automobiles registered - In 2003, approximately 6.8 million vehicles were registered in Virginia. That year, 5.3 million residents had driver's licenses.

Adopt-a-Highway - Every year, more than 6,000 Adopt-a-Highway groups collect about 300,000 bags of trash from 14,000 miles, or one-fourth of Virginia's roads.

VDOT research - The Virginia Transportation Research Center conducts research projects and studies that help to improve transportation safety, build and maintain a better transportation infrastructure, introduce new technologies and assess the social and environmental impacts of transportation.

Smart Traffic Centers - VDOT's Smart Traffic Centers use advanced technology to monitor traffic, keep it moving, and keep motorists informed of real-time weather and road conditions. The centers in Northern Virginia, Richmond and Hampton Roads operate 240 traffic cameras, 2,942 traffic sensors, 28 highway advisory radio transmitters and 284 variable message signs.

Smart Road - Virginia is home to the nation's only roadway test bed that also will handle regular traffic. The Smart Road – located in Blacksburg – offers researchers and product developers a state-of-the-art research lab for testing new transportation technologies.

Tallest bridge - At 175 feet above Wilson Creek, the Smart Road bridge in Blacksburg is Virginia's tallest bridge.

Wetlands - VDOT has created more than 800 acres of environmentally sensitive areas to compensate for wetlands affected by construction.

Noise barriers – 117 miles of noise barriers have been built along Virginia's highways.

Wildflowers - Each year, VDOT plants approximately 2,500 pounds of wildflower seeds that beautify highways and contribute to the environment.

Archaeology - VDOT archaeologists working in Culpeper County uncovered a Paleo-Indian jasper quarry site dating to 11,500 years ago. Over the past ten years, VDOT has undertaken major excavations on approximately 50 important archaeological sites.
